

SERVICES PORTFOLIO

IT Security & Compliance

Staying a step ahead of the bad guys requires focused management and execution. Make sure business technology protection is a priority.

IT Support Services

We monitor and manage our clients' networks, desktops, and everything in between.

Physical Security

There's one thing everyone agrees on - protecting your people and your assets is absolutely critical.

Corporate Audio, Video Services

Keep your people connected. Conferencing and video room systems save time, money and travel.

Structured Cable | Wireless Access

As the size and nature of your business changes, so will your need for IT access and more speed.

Professional Consulting Services

Need advice for a big project or want strategic input that will help you meet your IT goals?

IT Support Services

Data Center & Collocation

Still entrusting all your data to onsite servers? If so, you could be overlooking an affordable way to reduce risk from...

- Server crashes and unreliable backup processes
- Network intrusions, viruses and hack attacks
- Unpredictable service outages from utility and bandwidth providers
- Fire and flood that knock out equipment rooms
- Natural disasters and local emergencies that close your building

It's Your Business

Many businesses need a redundant data center, but find that building one from scratch doesn't make economic sense. An alternative is to use a third-party collocation facility. An off-site data center eliminates the cost of maintaining your own and mitigates the risks associated with on-premises infrastructure. Your mission critical systems and files will be available when you need them – even to your remote offices, call centers, and teleworkers.

What We Offer

- Power, Cooling & Security – Mission-critical requirements are met with scalable power, cooling infrastructure, and enhanced security
- Reliability – With access to multiple network service providers and carriers, you'll have access to a highly redundant network that never bogs down.
- Economy – Saves you money. An in-house data center with design deficiencies can be costly to operate and could put your IT investments in jeopardy.
- Redundancy – Solves the challenges presented by Sarbanes Oxley, HIPAA, SOX, SAS 70 and other mandates that require fail-safe protection of critical IT systems.
- Flexibility – Depending on your needs you can opt for different levels of management, including on-site maintenance support and proactive 24 hour monitoring, 7 days a week.
- Scalability – Whether your business needs space for 1 server or 100, NuLeaf can help.

We Make IT Easy

NuLeaf has storage solutions at a cost that makes sense. Whether you're running a small or medium-sized business, each and every NuLeaf client is valued. You'll know it, because we'll prove it every day. And it's why for years and years, our client relationships continue.
